

¿ How to Apply the Industrial Packaging Fee of €9/t?

Procircular has established a fee of €9/t for the specific case of industrial packaging originating from imports or intra-community acquisitions that the company uses in its production process, with waste generated at the company's facilities.

This fee can be applied to packaging made of any material and for all sectors, including both food and non-food industries.

Since this type of packaging involves the company acting as both the producer of the product and the final holder of the waste, and proper waste management is already in place, it is possible to propose a reduced fee. This reduced fee is intended solely to cover the costs associated with information management and data reporting to the authorities.

To apply this fee, it is essential to sign a final holder agreement with Procircular. Once the declaration is received, Procircular will contact customers opting for this fee to finalize the agreements. Under these agreements, the company will report data on the collection and recycling of this packaging to Procircular.

Should you have any questions or comments, please contact us at info@procircular.es, your account manager or through our website: www.procircular.es

Sincerely,

The Procircular Team
