EPR fees for Reusable Commercial and Industrial Packaging 2026

Rates for reusable containers are divided into two types: Type 1 and Type 2 tariffs. *

- The reusable packaging fee applies only to waste generated each year
- Type 1 tariffs will be of general application to all product producers
- Type 2 tariffs apply to product producers with more than 80% of their sales aimed at customers in large supermarkets/large industries that have their own management and provided that this is done through agreements with final owners. As it is waste that can be collected in bulk (non-hazardous waste, IBC/IBC, drums, pallets), and in a segregated and compacted way, management costs are lower.
