Glass	0,03484	0,00494

If the amount does not exceed €150 per flow (domestic, commercial, and industrial), a minimum amount of €150 will be established for each

*The specific fee for self-imports will be applied to products that major final holders import or acquire intra-community for use in the company's production process. It corresponds to cases in which the company is the producer of the product and the final holder of the same packaging. To apply this fee, the company must sign a final holder agreement with Procircular.
