Other materials	0,084
Hazardous packaging (except for aerosols, tubes, and cartridges)	0,165
Hazardous packaging: aerosols, tubes, and cartridges	1,000
Traceable circular fee*	0,009

Material	Weight factor (€ / Kg)	Factor no. of packaging units
Glass	0.03728	0.00529

If the amount does not exceed €150 per flow (domestic, commercial, and industrial), a minimum amount of €150 will be established for each

*This fee will apply in certain circumstances where the company qualifies as a producer of commercial or industrial packaging and can provide Procircular with traceable information on the proper management of packaging waste through private waste-management channels. To benefit from this fee, the company must enter into a final holder agreement with Procircular. Where appropriate, the fee may be applied subject to Procircular's prior validation of the specific circumstances and the traceability of the reported waste.

**Coffee capsules intended for the commercial sector and made from materials other than aluminium will be subject to the household packaging fee applicable to their material
