

EPR fees for Reusable Commercial and Industrial Packaging 2027

Rates for reusable containers are divided into two types: Type 1 and Type 2 tariffs. *

- The reusable packaging fee applies only to waste generated each year
- Type 1 tariffs will be of general application to all product producers
- Type 2 (BULK) rates apply when one of these conditions is met: more than 80% of tonnes are supplied to large customers and non-hazardous packaging waste is collected in bulk, or reinforced traceability is provided through agreements with final holders.
